

Cut the Cord, Boost Care: TAG-X® Wireless Charging

Unleash the Power of Mobility for Your Clinical Staff

Traditional medical carts come with a tangled mess of cords – a breeding ground for germs, a source of frustration, and a barrier to efficient care. TAG-X® delivers a revolutionary solution: **contactless charging** for your medical carts, workstations, mobile equipment, and devices.

Imagine a world where:

- **Infection prevention is effortless:** Eliminate cord and plug touchpoints, a major source of contamination.
- **Productivity soars:** No more hunting for outlets or wrestling with tangled cords. Staff can focus on what matters most – their patients.
- **Safety reigns supreme:** Reduce tripping hazards and eliminate the strain of cord management.
- **Morale thrives:** A streamlined workflow creates a more positive work environment.

TAG-X® delivers all this and more:

- **Patented wireless technology:** Effortlessly charges your equipment without the need for cords.
- **Improved sanitation:** No more wiping down cords or replacing hazardous clutter.
- **Simplified workflow:** Say goodbye to swapping batteries, wall mounts, and the constant search for outlets.
- **Enhanced Mobility:** Staff can move freely without being tethered to a power source.

Hear what medical professionals are saying:

“Love the TAG-X® wireless charging! I seek the TAGCarts out... If anything, I'd love to have more locations for charging, Lov'em!” – Nell Moroney, RN, ER Nurse New Mexico, USA

“The wireless charging wows are superior to corded or desktop workstations, not only because of the mobility and fast response but the ease and speed of parking the wow for charging.”

– Reuven Singor, M.D., ER Physician New Mexico, USA

Ready to cut the cord and elevate your clinical care?
